

LONGTUI 龙推®

LS885

Industrial Ride-On
Sweeper

The products are widely used in clean areas such as squares, parks, highway streets, residential quarters, airports, docks, stations, workshops, warehouses and so on; for cleaning such as dust, leaves, stones, paper and other garbage.

Characteristic

- The whole vehicle covers a modular design, and all components can be quickly disassembled, which is convenient for daily inspection and maintenance;
- Fully enclosed aluminum alloy cab, the body adopts engineering machinery general profile plates, one-time forming, smooth lines, strong and corrosion-resistant;
- Built-in dual fan dust collection system, stronger dust collection capacity;
- The maximum sweeping width can reach 2000mm, and the cleaning efficiency is higher;
- One-button operation, automatically lift the main brush and side brush;
- With good performance, it can meet the cleaning needs of different road conditions;
- Use high-performance maintenance-free lead-acid batteries, no leakage, zero discharge;

Optional high pressure flushing

Optional fog cannon

Technical parameter

Voltage	V	48
Cleaning width	mm	2000
Main brush length	mm	790
Edge brush diameter	mm	450
Cleaning efficiency	m ² /h	12000-14000
Driving power	W	1800
Trash bin capacity	L	180
Water tank capacity	L	80
Gradeability	%	25
Continuous working time	h	6~8
Working power	W	700+350*2+100*4+100*2
Turning radius	R	0(turn angle)
Filter area	m ²	8
Outline dimension	mm	2400*2000*2200
Machine weight	kg	800
